Liability Insurance
\$1,000,000 each occurrence
\$100,000 rented property damage
\$1,000,000 Personal & ADV Injury

Sheboygan Area Radio Kontrol Society
 The SHARKS Club began back in the 1960's, flying wherever they could find available space. In the early 90's, the club bought 28 acres of land between Hwy 23 and County Road C, near Plymouth and Sheboygan Falls, Wisconsin. Since that time, the club has grown and major improvements have been made. Today, SHARKS field has both paved north-south and east-west runways and neatly trimmed grassy areas, for flyers who prefer taking off and landing on a softer, more forgiving surface. Dirt off-road and oval tracks have been added for electric RC cars and trucks. The club house is a large four garage door building. The two pilots-only pit areas are marked off with chain-link fences that separate them from the public and provide protection from wayward planes. Both runways have five chain-linked flight stations spaced perfectly for pilot comfort and adhere to AMA regulations. We have electricity available for chargers, a spacious elevated gazebo shelter and a space for camper use.

Join Us For Fun! Whether it's airplanes, drones, gliders, war planes, helicopters or electric only RC cars and trucks. Come and relax, talk with our members, and become involved with a fun and ever-growing hobby.

Qualified Flight Instructors are ready to help anyone wishing to learn to fly for FREE. We have club planes and transmitters which are available to use for your instruction. We look forward to supporting anyone who is interested in learning to fly.

RC'ing at SHARKS requires membership in the AMA (Academy of Model Aeronautics) or ROAR (Remotely Operated Auto Racers). The club's by-laws are maintained by a board of directors and the club officers.
