## The Prez Sez...

*By Mike Gradinjan*

Say Hey, SHARKSters!

Well, we made it to 2022, but I didn't make the Kettle Area Flyers New Years Day fun fly. To be honest, I checked the early morning forecast and determined I wasn't enthused enough to charge up some batteries! Maybe next year! I've got some serious drifts around my house, and can only imagine what the driveway at the field might look like. Remember that the driveway drifts get pretty deep just before the gate, so don't get stuck!

This Friday, January 14, the SHARKS will be showing the 1990 version of [Memphis Belle](#) at the AHC. The movie starts at 7. Helpers and indoor flyers should be there at 6. We've had a great crew the last couple months, and I hope that continues. It makes Dave Meyer's life a lot easier. Please contact him if you can make it.

Make sure your AMA or ROAR memberships are up to date so you can complete your 2022 SHARKS Membership Application, which is included in this newsletter. Unless you're an opt-out member, remember you needed 15 hrs of club benefiting activities in 2021 to complete your obligation. This includes additional adult members where the first member is an opt-out. Please include \$5/unfulfilled hour with your 2022 application.

As always, contact me or any officer or board member with any questions or concerns you have, but in the meantime, Happy Flying RC'ing, and Happy New Year!

That's about it for now-

*Mike*

Yes, I went and did it.... I took the test from TRUST (The Recreational UAS Safety Test) through the AMA website.

<https://www.modelaircraft.org/trust>

To tell you the truth... It was not that bad. I had just completed taking the three-hour motorcycle pretest for my motorcycle class. And they were a lot alike.

Here is how it works... They give you some information and they show you illustrations and then they ask you a question. If you get the answer correct you go onto the next question, if you get a question wrong, they show you all that information all over again. You can keep going round and round looking at the information and see the illustration again and again until you get the answer correct and then you go onto the next question.

It's just an information type of question-and-answer exercise. It's not really hard. And yes, I know... some people say it's just a government getting in your face again to make us jump through hoops so that we can fly airplanes. But... if you think about the state of the world today, and how some *"'Ne'er-do-well"* people can deliver certain flying devices that might make life difficult on people, then you can see perhaps a little idea of where the government is coming from.

So just sign on through the AMA website and do the exercise. After taking this "test..." I cannot really call this a test... it's more of an informational exercise. So let's... "get 'er done."

By the way... more info can be found here...
